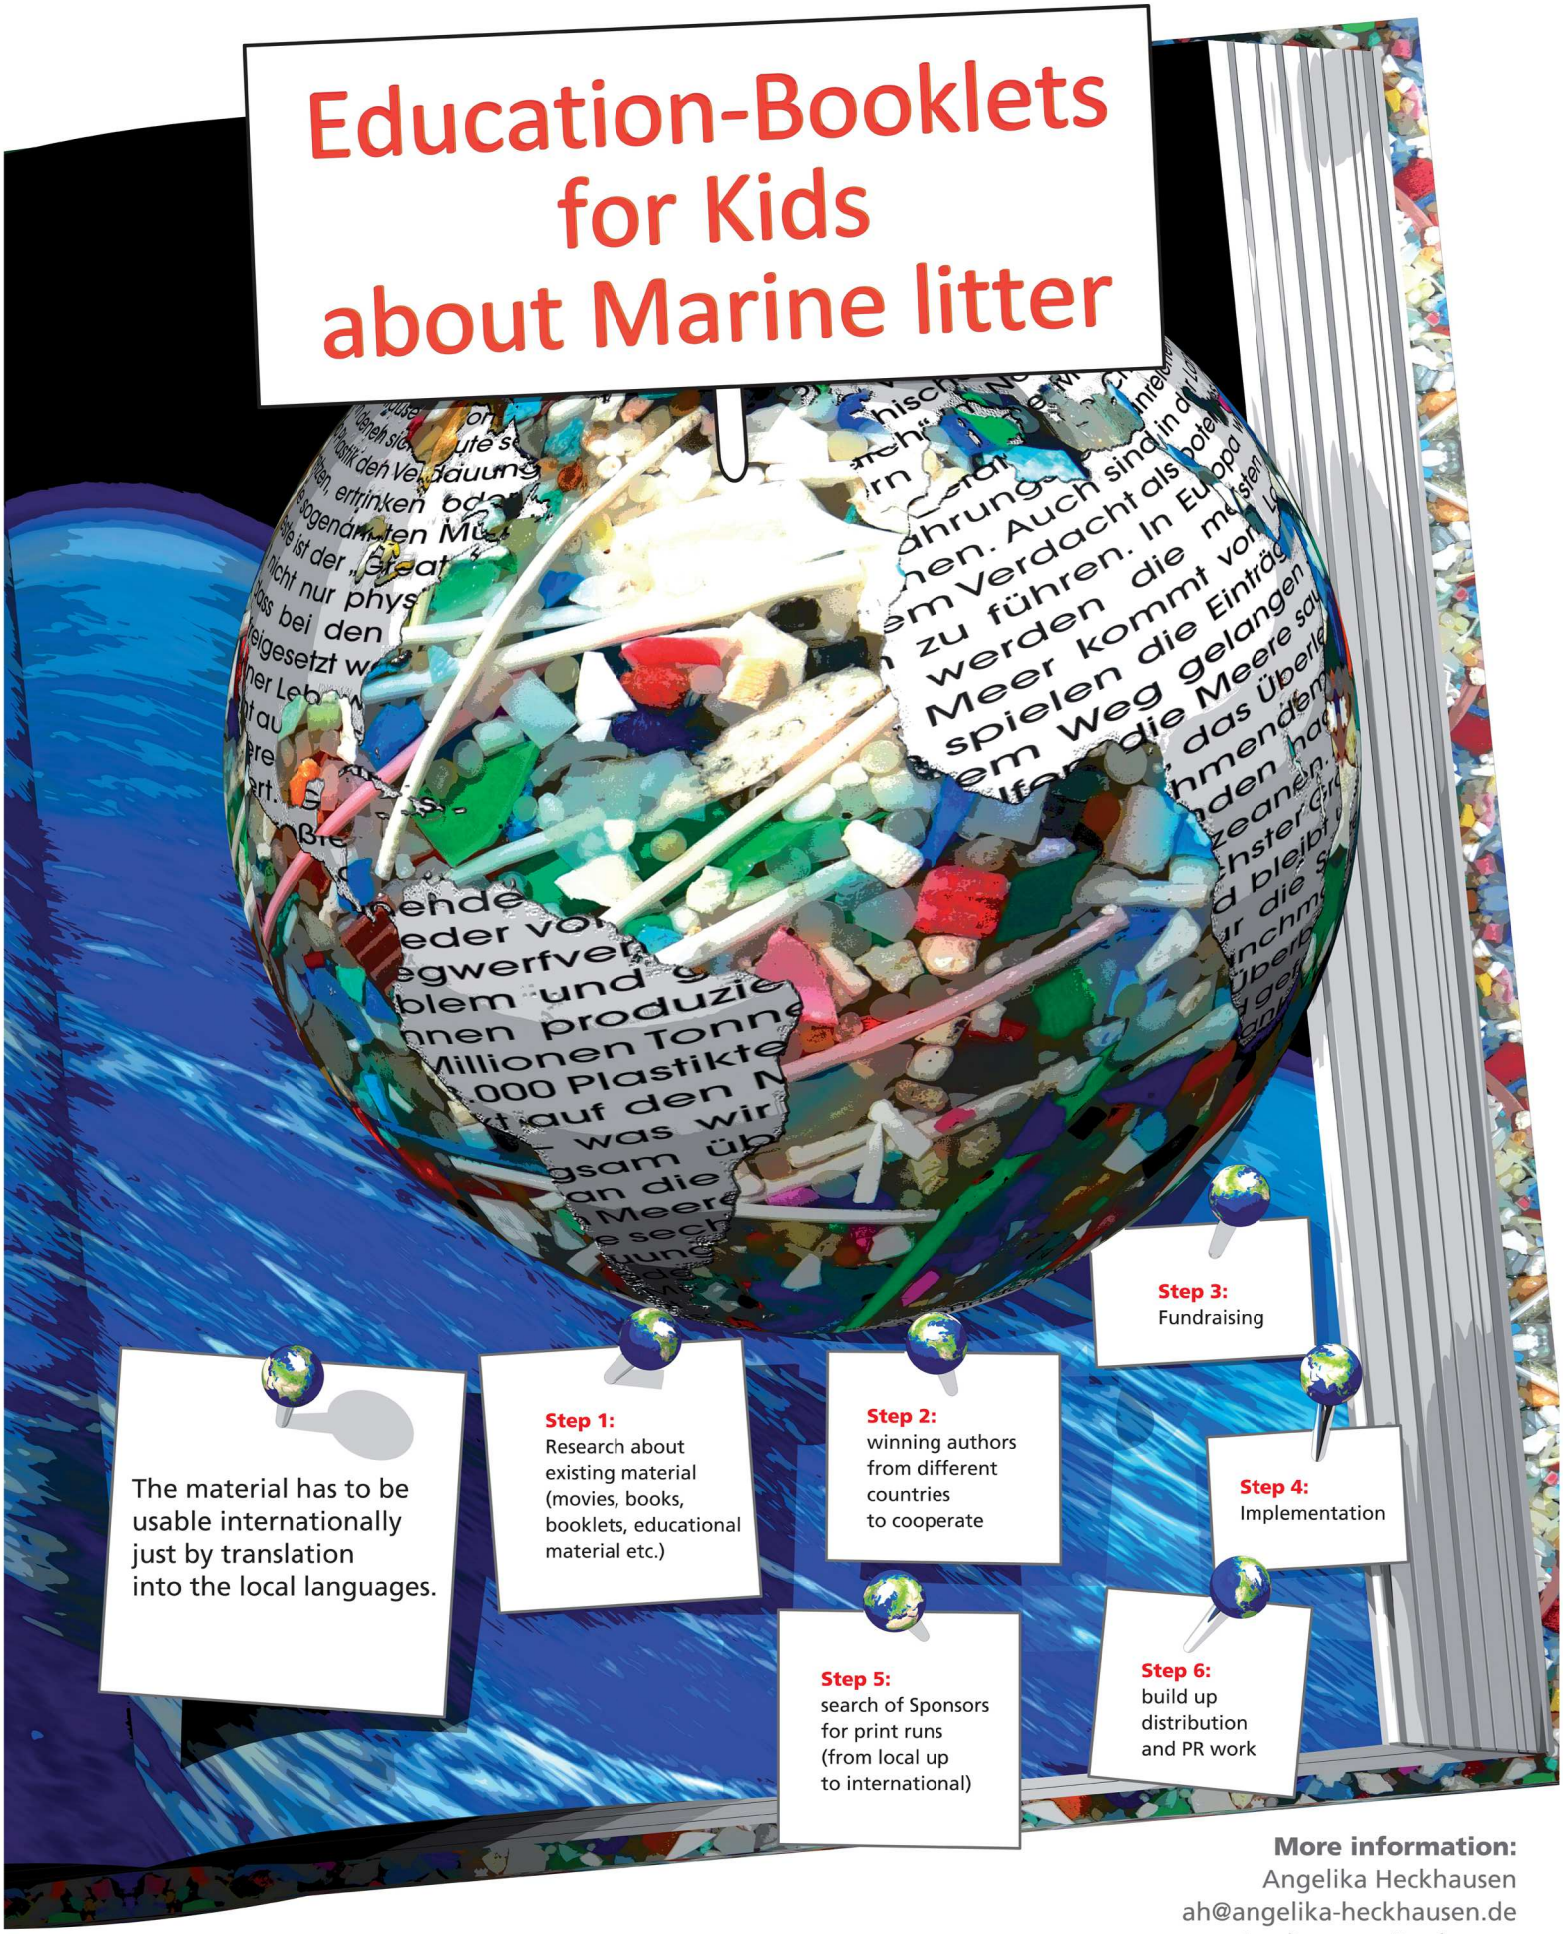
Create and spread free printed educational information material
about recognition and prevention of further entry of plastic waste into the seas
(e.g. books, brochures, etc.) for children aged about 6-10 years.
Information and instructions for teachers and parents should be included.

Education-Booklets for Kids about Marine litter



The material has to be usable internationally just by translation into the local languages.

Step 1:
Research about existing material (movies, books, booklets, educational material etc.)

Step 2:
winning authors from different countries to cooperate

Step 3:
Fundraising

Step 4:
Implementation

Step 5:
search of Sponsors for print runs (from local up to international)

Step 6:
build up distribution and PR work
