

Thomas Maes, Lisa Devriese & Sabine Derveaux

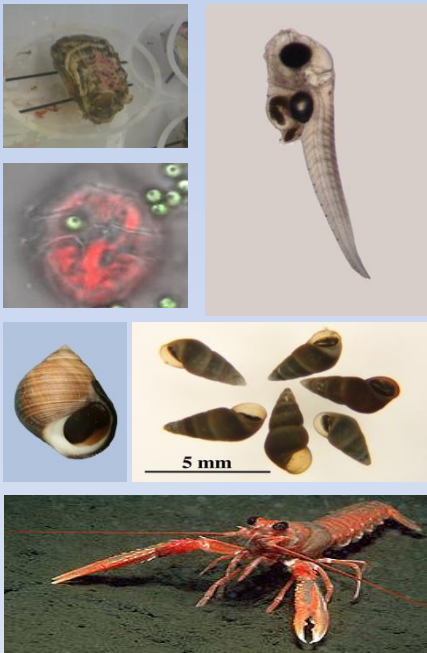

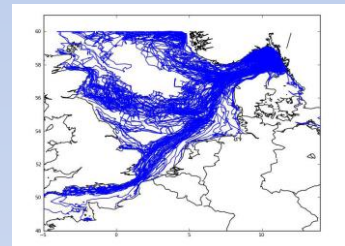

### Monitoring & Modelling

- Standard protocol
- Sediment/water/biota
- Characterisation
- Chemical and microbial load
- hotspots and pathways

### Impact Evaluation

- Exposure of key species
- Determination of effects
- Chemical load and transfer
- Bacterial load and transfer

### Socio-eco & Policy Measures

- Aquaculture/mariculture/fisheries
- Bacterial water quality
- Bacterial polymer degradation
- Policy support model
